 Contract Task Order (CTO) No. F27H

**Subject: SWMU 26 – Highway 58 Dump Site B at NSA Crane in Crane, IN**  
 • **Final RFI Report**

Dear Mr. Brent:

Tetra Tech prepared and issued a draft-final RCRA Facility Investigation (RFI) report for SWMU 26 – Highway 58 Dump Site B at NSA Crane in Crane, IN in November 2011. The RFI report addressed groundwater at SWMU 26 and recommended No-Further-Action (NFA). The Indiana Department of Environmental Management (IDEM) approved the draft-final RFI report for SWMU 26 via email on December 30, 2011. The email from IDEM stated that: *"The detections in the groundwater do not represent a threat to human health or the environment. No Further Action is required at this site."*

Hard copies in binders and CDs of the draft-final RFI report were previously issued. The cover and title page in the binders should be changed from draft-final to final and the CD revised. Therefore, as discussed, attached please find four sets of the "final" cover and title page, and four complete "final" CDs; these pages and CD can be inserted (and replace previous pages and CDs) into the SWMU 26 RFI binder and the report will be complete and final. Via copy of this letter, we are also sending a complete binder copy of the final RFI Report to Mr. Howard Hickey; the copy includes a hard copy of the text, figures, and tables and the complete report on CD. A complete hard copy of the report and CD is also being provided to Mr. Glen Wagner for the administrative record.

Please contact me at 513-557-5057 (Tony.Klimek@TetraTech.com) or George Ten Eyck at 513-557-5043 (George.TenEyck@Tetra.Tech.com) if you have any questions regarding this RFI report.

Sincerely,

Anthony P. Klimek, PE  
 Project Manager
